

MXP-1000 TAYRONA POWERED BY MWFLY UPDATE (10/NOV/2025)

World Aircraft Company South America, **WACSA S.A.S**; by this means is in a position to inform to the aviation community that the engine manufactured by **MWFLY, SRL** (from Italy); specifically, the model **Spirit** from their **REDLine Series**; at the moment of this release, is close to complete 80hrs of operation installed in our widely known aircraft Model **MXP 1000 Tayrona**.

During this period and according to the engine's manufacturer, the match **Tayrona-MWFLY** have been subjected to different ground and in-flight testing where the required adjustments were detected and implemented; the performance and safety of the platform evaluated and the reliability of the powerplant confirmed.

Based on the above, WACSA S.A.S is capable to state:

**** The MWFLY Spirit Engine is another viable powerplant option for our aircraft Model MXP 1000 Tayrona, provided it uses the specific engine mount developed by WACSA S.A.S and installed, operated and maintained in accordance with instructions and limitations as defined by MWFLY and WACSA approved documentation.***

**** Just as with the other engine brands installed in the MXP 1000 Tayrona, all powerplant technical support is provided directly by the manufacturer (<https://www.mwfly.it/en/>)***

Finally, WACSA S.A.S inform that the only valid and applicable updated technical concepts and information regarding our aircrafts is solely and exclusively found in our official media, that is, our website: www.wacsa-aero.com and e-mail: info@wacsa-aero.com
